

REVIEW LECTURES

Basic Construction Math 1 & 2 ♦ Basic Electrical Theory ♦ Basic HVAC Theory

If any of your students are having difficulty with a particular portion of their exams, one of our “Basics” lectures may be of help. These lectures are only available on DVD because the instruction relies heavily on visual diagrams.

Basic Construction Math, Parts 1 & 2 (approx 120 min):

A much more in-depth review than the “Math Review” tape that accompanies most trades. The lecture covers basic arithmetic, decimals, fractions, percentages, units of measurement, unit conversions, and the fundamentals of geometry and algebra.

Basic Electrical Theory (approx 60 min):

Intended for students who will be facing electrical problems on their exam, and are unfamiliar with the calculations involved. General Building, General Engineering, C-11, C-20, C-27, C-38, C-45, C-46, and C-53 students who are having trouble with the electrical questions in their practice exams should watch this lecture.

Basic HVAC Theory (approx 60 min):

Excellent supplementary material for C-20 and C-38 students, but could also help General Engineering, General Building, C-2, C-36, and C-46 students as well.

Lecture	Price (# per purchase order)		
	1-5	6-10	11+
Basic Construction Math DVD	\$9.00	\$8.50	\$7.75
Basic Electrical Theory DVD	\$9.00	\$8.50	\$7.75
Basic HVAC Theory DVD	\$9.00	\$8.50	\$7.75
